

## RULES OF BEAT THE HOUSE

### DICE:

Dealers call for all bets to be made. All bets are placed before the dealer rolls a pair of dice. The object of the game is to roll a higher number than the dealer, which pays EVEN. The dealer wins all ties: If the dealer rolls a 12 (double 6) to start, the dealer wins immediately, and picks up all bets without any players' rolling. If the dealer rolls a 2 (snake eyes) to start, the dealer loses immediately, and pays DOUBLE.
